Mansi Pandit

Software Engineer | Java · Spring Boot · Kafka · MySQL · Redis

Noida, India (Open to relocate & remote) | +91 6203337228 | mansipandit2024@gmail.com

LinkedIn | GitHub | LeetCode | Portfolio

SUMMARY

Software Engineer with 2.5+ years of experience in Java backend development, building and optimizing Spring Boot services, Kafka event pipelines, and database-heavy systems that serve millions of users. Skilled in performance tuning, distributed systems, and AI-assisted development, including building AI agents for day-to-day engineering work.

EXPERIENCE

SplashLearn — Gurugram, India **Jul 2024 – Oct 2026**

Software Engineer *Tech: Java, Spring Boot, GraphQL, Kafka, MySQL, MongoDB, Redis, Elasticsearch, Mixpanel*

- **Scaling & Performance:** Optimized home page and curriculum queries, cutting load time **20%** for **300K+ daily users**.
- Reduced API latency by **20%** by optimizing database queries and API response paths in **Spring Boot** services.
- Cut cron runtime from **10 to 4 minutes (60%)** by optimizing SQL for personalized progress-email jobs serving **200K+ users**.
- **Full-Stack Features:** Built SplashLeague, a competitive quiz contest for students, end to end (**Spring Boot** REST/**GraphQL** APIs and UI); used **Redis** caching with timed invalidation to handle **millions of concurrent users**.
- Fixed coin balances that differed between the child dashboard and parent profile by consolidating data from multiple databases into a **single source of truth**; added **Kafka** event pipelines to improve purchase-flow latency and reliability.
- Owned the achievement system for **300K+ users**: Math/ELA goal celebrations and snapshot stickers.
- **Architecture & Experimentation:** Extended the **A/B testing** and **feature-management architecture** to roll out the achievement feature to specific user flows and segments (trial and paid), with segment-level analytics.
- **Personalization & Analytics:** Improved recommendations using recent play and Math/ELA preferences, contributing to a **10% engagement increase**.
- Instrumented **Mixpanel** across **5M+ users**; built **Elasticsearch** dashboards for API performance and error monitoring.
- **AI Engineering:** Built **Claude-assisted AI-agent workflows** (Claude Code, Cursor) for feature analysis, execution mapping, and test generation, cutting delivery time for selected features from **1 week to 2 days**.

Nikola — Remote **Dec 2023 – Feb 2024**

Software Engineer Intern *Tech: Java, Node.js, MySQL*

- **Database Optimization:** Reduced **MySQL** query costs by **20%** by analyzing slow queries and designing **indexes**.
- **Backend Data Modules:** Built **Java** and **Node.js** data modules for IoT services in a battery lifecycle platform for battery OEMs.

Microsoft — Hyderabad, India **Apr 2023 – Jun 2023**

Software Engineer Intern *Tech: PowerShell, Azure, RDBMS*

- **Internal Tooling:** Gathered requirements and extended an internal tool's **Azure** subscription **cmdlets** to support more keys, reducing workflow complexity by **10%**; validated **7+ cmdlets** using **PowerShell**.
- **Analytics & Stakeholder Dashboards:** Built an **RDBMS** dashboard for product managers tracking customer usage.

PROJECTS

- **Chatbot with Voice Integration** (Node.js, Dialogflow): NLP chatbot with voice input using Google Speech APIs. GitHub
- **MySecure, Face Authentication Password Manager** (Python, Flask): Face-authenticated encrypted vault. GitHub
- **CampShare, Trip Platform** (Node.js, MongoDB): Travel platform with maps, reviews, photos, and authentication. GitHub

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL

Backend: Spring Boot, GraphQL, REST APIs, Node.js, Kafka

Databases: MySQL, PostgreSQL, MongoDB, Redis, Elasticsearch, RDBMS, query optimization and indexing

Cloud & Tools: AWS, Azure, GCP, Docker, Kubernetes, Jenkins, PowerShell, Flyway

AI Engineering: LLM agents, tool use, context engineering, Claude Code, Cursor, GitHub Copilot, AI-assisted test generation

Core CS: DSA, System Design, Distributed Systems, OOP, OS, DBMS, Networks

EDUCATION

Dr. A.P.J. Abdul Kalam Technical University | B.Tech in Computer Science | CGPA: 8.2/10 **2020 – 2024**

LEADERSHIP & ACHIEVEMENTS

- GDSC Lead (10+ events); Postman Student Leader (API workshops, 100+ students); Microsoft Learn Ambassador.
- Microsoft Engage '22; McKinsey Next Gen Leader '23; CodeKaze AIR 98; solved 600+ LeetCode problems.
